## ガンプラカーニバル

"GUNDAM Carnival", the annual special Gundam sample image gallery featured in "Hobby JAPAN"! For this time, we are happy to announce "GUNPLA Carnival Special Edition 2013" as a special mini book by BANDAI Hobby Department X Hobby JAPAN!

With this early spring power, we will deliver super passionate Gundam sample images along with the latest information finally revealed in the mini book!!

The Slogan is "Fun to build GUNPLA"!!

FULL PSYCHO-FRAME PROTOTYPE MOBILE SUIT

BANDAI 1:144 scale plastic kit  
"High Grade Universal Century" modeled by Keisuke WATANABE

FULL PSYCHO-FRAME PROTOTYPE MOBILE SUIT

# RX-0 FULL ARMOR UNICORN GUNDAM

## [UNICORN MODE]

"RX-0 FULL ARMOR UNICORN GUNDAM [UNICORN MODE]" appeared in the last part of episode 6 for a battle with BANSHEE NORN. We are excited about his action in episode 7. High Grade Universal Century (HGUC) kit that everyone was long waiting for will be on sale in May. It has HGUC UNICORN GUNDAM [UNICORN MODE] (already in store) and new parts which will duplicate various equipment. This amazing volume is GUNPLA fans' must-have item. In the sample image modeled by Keisuke WATANABE revealed for the first time, he upgraded details on Unicorn body and finished Full Armor Unit with almost straight out of the box form. However, his colors are very detailed and Unicorn body was finished with pearl white. Full Armor Unit duplicates two separate colors and it was built as a high-end spec by applying a water slide decal made specifically for "HGUC UNICORN GUNDAM" sold separately. Also, Full Armor Unit is fully detachable (Beam Gatling Gun can only be used when fully armed, and attached shields do not reproduce full unfolded gimmick) and can be attached to UNICORN GUNDAM [DESTROY MODE] sold separately. If you can't wait for its appearance in episode 7, why not try them?

Even though it is heavily equipped, mobility of Unicorn body is still the same and can easily make action poses. The stand for standing position is detachable.

The head part is the same shape as HGUC UNICORN which is already on sale. The sample image shows more fearless image by shaping blade antenna slightly sharp.

Beam Gatling Gun can be attached to the arm part. When attached to the left arm, it will duplicate its armed pattern in episode 4 appearance.

Full Armor Unicorn equipped unfolded position. It comes with Beam Magnum and Hyper Bazooka as bonus parts which enable to cover most of UNICORN GUNDAM [UNICORN MODE] armed patterns in the episode.

FULL PSYCHO-FRAME PROTOTYPE MOBILE SUIT

# RX-0 [N] UNICORN GUNDAM 02 BANSHEE NORN [UNICORN MODE]

BANDAI 1:144 scale plastic kit  
"High Grade Universal Century"  
modeled by Hiroyuki NODA

Shape of the head part is same as HGUC BANSHEE (already on sale), but gold part's molding color is different. Blade antenna in the sample image is cut slightly sharp. Especially, visor part shows thinner and sharper figure which gives a sharp figure.

BANSHEE NORN greatly developed by Armed Armor DE and Armed Armor XC. The effect highlighted various action poses. An action base sold separately is highly recommended because episode 6 is many about space wars. (The sample image uses action base 03 black)

The new parts, backpack Armed Armor XC is a straight out of the box structure. Beam Magnum with Revolving Launcher and Armed Armor DE were well painted based on the set image. Adjustable Armed Armor VN was done featured by the clear parts.

High Grade Universal Century (HGUC) the latest kit "RX-0[N] UNICORN GUNDAM 02 BANSHEE NORN [UNICORN MODE]" which was released at almost same time as coming of episode 6. This kit reproduced new equipment with new parts such as Revolving Launcher equipped Beam Magnum, Armed Armor DE, and Armed Armor XC based on the current HGUC BANSHEE [UNICORN MODE]. This kit is an amazing kit as it comes with mobile type Armed Armor VN as a special kit.

When looked at the sample image by Hiroyuki NODA, he mainly added a twist to the blade antenna and different parts' surface configuration by sharpening. Pay close attention to the paint of Black Gundam image that he put his efforts into.

HGUC RX-0 [N] UNICORN GUNDAM 02  
BANSHEE NORN  
[UNICORN MODE] (1,785  
JPY already on sale)

Comparison with right out of the box model (left). Sharpening each part creates more distinguished image. The body color differentiates from the previous sample image by using the color closer to black than original one.

# GUNPLA LOVE

## What is GUNPLA LOVE?

The concept of "GUNPLA LOVE" is "bright, happy, passionate GUNPLA". The sample image gallery is a place with no complaints which was made for modelers to build GUNPLA freely based on their own libido and to enjoy GUNPLA.

Our familiar "Boso" Gundam sample image gallery "GUNPLA LOVE". As a special edition in the mini book, you will find "GAT-X105 AILE STRIKE GUNDAM" the leading driving force in RG series including unseen cuts from "Mobile Suit GUNDAM SEED" and uniquely made renewal kit "GAT-X252 FORBIDDEN GUNDAM". The producer was SEIRA MASUO who is a distinct modeler with "Masuo Details". He added Masuo Details and his original touch as an accent to both which make them even more attractive that could only be seen in original work (\*Note: this is an unique model and it is not SUNRISE official set).

BANDAI 1:144 scale plastic kit "Real Grade"  
**GAT-X105 AILE STRIKE GUNDAM**

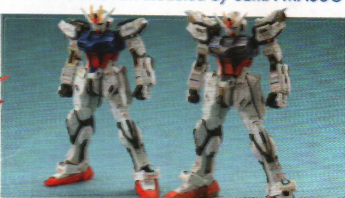

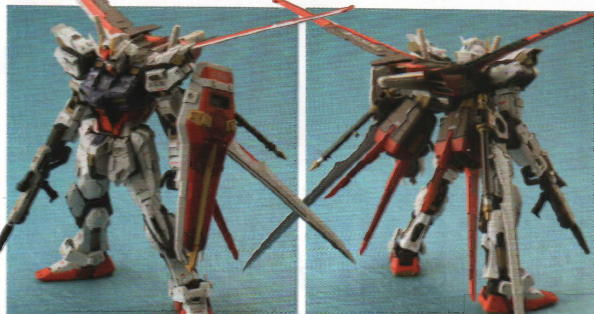

BANDAI 1:144 scale plastic kit "High Grade GUNDAM SEED"  
**GAT-X252 FORBIDDEN GUNDAM**

modeled by SEIRA MASUO

## GAT-X105 AILE STRIKE GUNDAM

BANDAI 1:144 scale plastic kit "Real Grade" GAT-X105 AILE STRIKE GUNDAM modeled by SEIRA MASUO

For the head part, four of the Blade Antennas were shortened and the face was tucked in just as Masuo liked. Creating a gap by thin plastic plate application and additional line engraving make it Masuo style. When compared with straight-out-of-the box structure (left), you will see that the balance is more powerful with additional parts on the shoulder.

## GAT-X252 FORBIDDEN GUNDAM

GAT-X252 FORBIDDEN GUNDAM BANDAI 1:144 scale plastic kit "High Grade GUNDAM SEED" modeled by SEIRA MASUO

Because the head part feels huge for its recent trend, it was miniaturized by trimming the bottom part of the mask and miniaturizing the crest. It was adjusted by placing the mask part a little more towards the back. To achieve more fearless image, the peak's front line was adjusted.

Surface configuration of the backpack which creates high speed attack system was greatly adjusted by attaching HIG to Archer to the middle. As for energy deflection armor "Geschmeidig Panzer", the field emit part was changed and Masuo details were added to the entire body.

Under construction. You will see that the shapes of each part and balance adjustment create great effects.

Comparison to right out of the box structure (left). This time, it was built as a normal Forbidden other than original Hand Gun emphasized in shooting.

## Advise from ProModeler, SEIRA MASUO

Using parts from other kits to create your own body is recommended. Sometimes, this method gives you different ideas as you build different shape. The more the merrier! I get scolded by my staff if I keep the way it is, but please be creative and enjoy building GUNPLA!

# Mobile Suit Gundam SEED DESTINY Main HG Kit Guidance

1:144 scale kit series "HG GUNDAM SEED" which can be called as a current GUNPLA standard. It is a fully movable model with more color detailed parts and poly parts, with from arms to variety of options that even heavy users can be satisfied. HG GOUF IGNITED (HEINE WESTENFLUSS CUSTOM) and later model use series common display base (some non-attachment items have bearings also) which enables to display flying pose and increase its play value. This can be said as a base for the high potential High Grade (HG) series and High Grade Universal Century (HGUC).

## HG FORCE IMPULSE GUNDAM (1,575 JPY)

The main model HG kits in the first part before the appearance of Shinn Asuka. High energy beam rifle as arms to various arms come with the kit. Chest Flyer and Leg Flyer can be duplicated. Force Silhouette is detachable and injection mode combined with Silhouette Flyer can be duplicated.

## HG SWORD IMPULSE GUNDAM (1,575 JPY)

From Excalibur Anti-Ship Laser Sword to various arms come with the kit. Chest Flyer and Leg Flyer can be duplicated. Core Splendor comes with mid-flight form other than united form. Excalibur can unite to duplicate Ambidextrous Form.

## HG LEGEND GUNDAM (1,575 JPY)

When assembled with effect parts that comes with assault beam machine gun, up to 6 firing modes can be duplicated. Defiant a.k.a. Beam Javeline comes separately. Beam Saber and Beam Shield are duplicated with clear parts (clear blue).

## HG OOWASHI AKATSUKI GUNDAM (2,520 JPY)

Full body beam reflection armor "YATANO KAGAMI" is duplicated with gold plating. Air combat equipment in the atmosphere "Stellar's Sea-Eagle" is detachable and can be duplicated as its battling combat system. Type 73J2 prototype twin Beam Saber blade is duplicated with clear pink.

## HG STRIKE FREEDOM GUNDAM (1,680 JPY)

Super Dragoon is detachable and can be combined with effect parts which come with the kits to duplicate up to 4 injection modes. Super Lacerta Beam Saber and Beam Shield are duplicated by clear parts (clear blue).

## HG INFINITE JUSTICE GUNDAM (1,680 JPY)

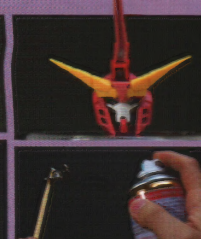

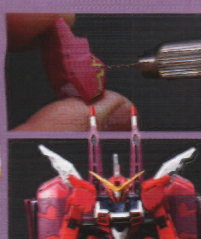

Back part lifter "Fatum 01" is detachable and can create various actions when connected. Beam parts such as beam shield are duplicated with clear parts (clear blue). This kit comes with a display base that can show it off in mid-flight position.

## Feel Its Unlimited Possibility by Connecting HG Kit and RG Kit!

For those intermediate level modelers who might feel "Right out of the box is not cool! Painting is a must. But remodeling and building one from two kits sounds crazy...", we will deliver our popular how to article "HJ GUNPLA Complete Lecture" in Hobby JAPAN. In June issue (issue date: April 25th), you will find "ZMGF-X19A INFINITE JUSTICE GUNDAM" built from assembling RG JUSTICE GUNDAM and HG INFINITE JUSTICE GUNDAM for RG DESTINY GUNDAM release! If you just read this article, you will know how to build one using two kits with your own RG style!

RG JUSTICE GUNDAM (2,625 JPY)

# You Can Do It Yourself!! The Simple Method of Building GUNPLA.

## [RG ZGMF-X42S Special Edition of DESTINY GUNDAM]

"You can do it yourself!! The simple method of building GUNPLA", one of popular "How to" articles that introduce a simple building method which enhances the effects of molding colors of the products. The latest kit "Real Grade (RG) ZGMF-X42S DESTINY GUNDAM" is to be released on April 27.

By assembling armors into Advanced MS Joints, high active quality is realized, and by assembling exterior components, finely separated into each part, a high density 1:144 scale DESTINY GUNDAM, that you have ever seen before, is built. This model is high-end model where the mobility of Advanced MS Joints realizes most of actions seen in films such as a posture holding Aroundright without any problems. In this article, easy tips of building GUNPLA are introduced. Even those who never have built GUNPLA can make your GUNPLA up-graded and more completed model than just assembling with a regular instructions! So let's begin!

RG ZGMF-X42S DESTINY GUNDAM

●Sold by: BANDAI Hobby Department ●2,625 JPY, to be released on April 27 ●1:144, about 13cm ●Plastic Model Kits

### For You to Prepare

#### ■ Nipper, Design knife

Use a nipper made for plastic model building. Though there are many kinds of nippers, we recommend a nipper with a thin edge (about 2,000 JPY). The BANDAI GUNPLA nipper shown here is the one given at a campaign (not for sale). A design knife is suite to work for fine details (about 600 JPY).

#### ■ GUNDAM marker

An alcohol marker (210 JPY) for GUNPLA sold by GSI Creos Corporation. It can be used for coating since it contains pigments and has a good obliterating power. A set with six markers for different uses are on sale (1,260 JPY).

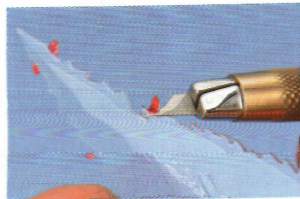

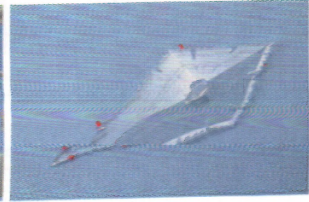

"GUNDAM marker: the real touch marker" is an alcohol marker with dye compounds that provides gradation effects. A set of five colors and one gradation pen (1,260 JPY). Each pen (210 JPY). Suite for inking.

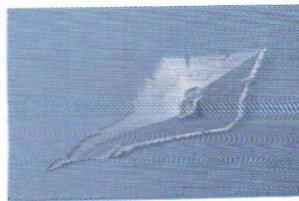

### ■ Clip Out Each Part Nicely!

RG DESTINY GUNDAM is prepared by "gate method" for anyone to clip out easily, where all parts are placed to runners by cavity gates. The bonding faces between parts and gates in cavity gates are relatively small. This time, let's take two steps to clip them out, so that it will look nicer. Clip out parts by remaining a few gates.

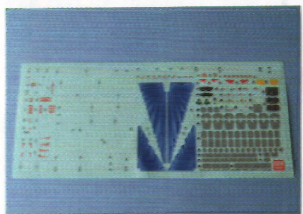

Carefully form the gates by using a knife. Do it slowly. Watch your fingers as the knife is very sharp.

Formed parts. Even complicated shaped parts can be clipped off quickly because of cavity gates. Be careful to handle clear parts as it is difficult to fix them once damaged.

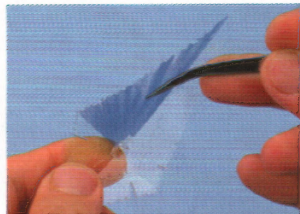

### ■ Let's create Beam Shield

"Realistic Decal", a marking sticker which enhances the fascination of RG by gold-and silver-leaf. It appears difficult to handle, but it can be used in the similar way as tetronic stickers.

The Beam Shield of RG DESTINY is created by attaching gradation printed stickers. Apply some water on the bonding areas of the stickers removed by a tweezer in order to weaken its adhesive power, so that the stickers can be placed easily.

Once the placing position is decided, put the sticker. Place it carefully. Wipe off remaining moisture.

After placing the sticker. It is nicely placed. To place Beam Shield from the side first is a tip. Watch the center part not to have any gaps.

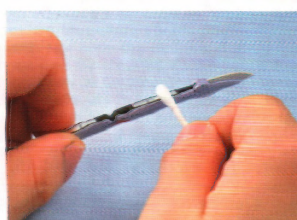

## Let's Place "Realistic Decal"!

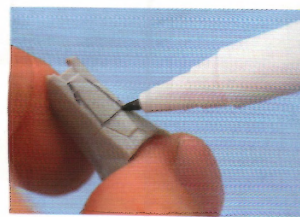

"Realistic Decal", a marking sticker which enhances the fascination of RG by gold-and silver-leaf. Like Beam Shield, apply some water to the bonding area in order to weaken its adhesive power, so that placing the sticker becomes easier. Due to the great number of stickers in RG, a small misplacing can cause overlapping of stickers. Adjust places of stickers by a tweezer.

Once the placing position is decided, put the sticker. Wipe off any remaining moisture. Do it carefully so that stickers don't move. There are many stickers in RG. It requires some patience.

The gold-and silver-leaf of Metallic stickers require delicate handling. Use a soft material such as Q-Tip (a cotton bud) to hold the stickers in order to place it without damaging it.

Details and line engravings are provided to the entire parts of RG DESTINY GUNDAM. To enhance such effects, let's do inking. First, draw lines on line engravings by a real touch gray 2 of real touch markers.

Use an eraser to any smudge before it gets dried. Wipe off runoffs by using the fine edge of the gradation pen.

In case an eraser and/or the gradation pen don't work, use Kleenex absorbed by paint thinner. Watch not to put too much paint thinner as it may ruin the surface of parts.

After inking, line engravings and texture of surfaces are enhanced and improved its 3D effects. You may use any colors of the pen though a real touch gray 2 was used for this time.

## Completed!! RG ZGMF-X42S DESTINY GUNDAM!!

Completed RG DESTINY GUNDAM. It is obvious the appearance improved in a great scale. Since REAL GRADE is a kit that offers you collective techniques of GUNPLA, it is easy to assemble and it provides a high-quality finished form. Some basic forming techniques such as clippings and gate handlings, marking, inking and partial painting provide an up-graded complete model. Create your own completed RG DESTINY GUNDAM!

Since it is made to enhance the effects of molding colors, the strength of this simple method is to realize dynamic actions without concerning coating damages on the surfaces. To produce the vivid dynamism, use ULTRON DYES, that you can purchase separately. It holds your RG perfectly. Check out below steps for HOW TO APPLY.

## PREMIUM BANDAI is now accepting orders for "WING OF LIGHT"!!

PREMIUM BANDAI is now accepting orders for "WING OF LIGHT", a designated extension part for RG DESTINY GUNDAM. It is made of polyethylene terephthalate (PET) formed a various curvy shapes. It provides complicated expressions of light derived from hologram-processed gradation prints. Furthermore, a set of action bases 2 molding smoke clear black that can create sharp actions in the air is coming on sale. It was an impressive scene in the film, so why not enjoy that scene yourself!

### EFFECT UNIT "WING OF LIGHT" for RG DESTINY GUNDAM

- Sold by: BANDAI Hobby Department ● 1575 JPY, now accepting orders. Shipping timetable: in May/June ● PET & Plastic model kits
- Sellout item of PREMIUM BANDAI ● 1:144 ● Plastic model kits

\*RG DESTINY GUNDAM is sold separately. The image shows a sample model. \*NOTE: The number of production of this model is limited. Once the order reaches the limited quantity, your order will be temporarily suspended or will not be accepted. \*PREMIUM BANDAI limited item availability may vary by region.

# "If you are not sure, get this GUNPLA!!!"

collections, there are many great kits existing. Editors of Hobby JAPAN suggest these GUNPLA with confidence with our own opinions and prejudice!! If you are unsure, pick these! You will not regret!

## PG GUNDAM ASTRAY RED FRAME (12,900 JPY)

This red frame is the only perfect grade kit from side story. One part of the frame mechanism is common with PG STRIKE GUNDAM as its setting and its existence under the setting perfectly shows brotherly relation and most of the parts are duplicated to completely new and it duplicates its attraction

as Astray perfectly. Even under the setting, because it enable us to create movable frame, the PG can be said "Real Astray". The biggest feature of Red Frame/a special move called Gerbera Straight was arranged to a sword type which only PG can perfect, and it goes beyond the Astray's development concept "realization of movability which people can create" and it enable us to enjoy its bold sword action just like samurai.

## LEGEND BB MUSHA GODMARU (1,950 JPY)

MUSHA GODMARU is the main character of "Shin SD Sengokuden Chou Kidou Daishougun". The previous product series "BB Senshi No.141 Kit" has the best selling record among BB Senshi series. It also won the popularity vote held in Twitter as the celebration of the 25th anniversary of BB Senshi.

The emergence of Godmaru expands the story of Legend BB series. The kit allows you to create a form of "Bakunetsu no jin" without replacing. The battle surcoat is well represented for both the front side and the back side. Bakunetsu armour can be put on outer arms, which further enhance the sense of action. All the details allow.

## MG MS-06J ZAKU II Ver. 2.0 (3,675 JPY)

MG ZAKU II which starts MG finally achieved its overhaul after the 12 years of technology development. Even it has many parts, developers focused on the simplicity as a plastic model so that there is practically no need for "gluing parts -> joint shaping". By sharing same basic mechanisms, MG ZAKU II Ver. 2.0 have had various machines including CHAR custom, high movable system, MAIN LAYER, ZAKU CANNON other than air combat F type after this J type. It might be fun to see the system background differences by building various systems.

## MG ZGMF-X10A FREEDOM GUNDAM (3,990 JPY)

It is the latest MS "ZGMF-X10A FREEDOM GUNDAM" that Kira Yamato made an appearance in the last part of the series of "Mobile Suit Gundam SEED" from HD Remaster Project started in 2012 that people loved. This kit is proud of its stylish form from the story and the high spec for its bold action, which has the highest level of perfection. Baraena Plasma Sabot Cannon and Xiphias Rail Cannon which are normally stored in the wings can be unfolded just as its setting. Sabot Cannon base part also has a movable

shaft other than wings' unfolding. "High Maneuver.Aerial.Tactical full burst mode" which is the first in GUNPLA that enables both armor and wings to unfold together. That is one of the great features of this kits. FREEDOM GUNDAM also appears in "Mobile Suit Gundam SEED DESTINY" HD Remaster Ver. started in April. So, please check that out!

## MG OZ-00MS TALLGESE EW (3,990 JPY)

This is a high detailed MG style which appeared in the comics "New Mobile Report GUNDAM W: The Glory of Losers"(MANGA:Satoshi Ogasawara, WRITER: Katsuyuki Sumisawa). This is the "three-dimensional analysis of what TALLGESE is about" including the new explanation of why changing

the layout of back super burner made it possible to have cool action poses just like animation. Attractive features about it are Blowback Motion Gimmicks of Doper Gun Barrel, rough face just like Gundam's head which can be changed and created by adjusting face position, and many other details. Also, don't forget to pay attention to its system and the

forms based on the production model MS LEO which will be developed in the future for its setting. This is the kind of body the moment you touch it, you will want MG WING GUNDAM EW as a pair, and is perfect for the first MG "GUNDAM W" collection.

## MG MSN-06S SINANJU STEIN Ver.Ka (7,350 JPY)

"MSN-06S SINANJU" is the one you cannot ignore among "Mobile Suit Gundam UC". Its origin is "MSN-06S SINANJU STEIN". HAJIME KATOKI produced MG kit and it was released as "Ver.Ka" series. You can feel his twist to Gundam body from each part.

Including exterior, most parts were redesigned and making decals created by Mr. Katoki were added. It is truly the most perfect SINANJU STEIN. Even though some parts like joint are same as MG SINANJU, it has a new shape rather than just a look of it, and you will see the difference from the others which is the great part. It is also nice that specialized Bazooka comes with the kits.

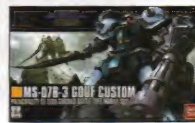

## HGUC MS-06F-2 ZAKU II F2 (1,575 JPY)

One of the most popular series among the Gundam history is "Mobile Suit Gundam 0083 STARDUST MEMORY". The later version of Zaku II which appeared in the series is "MS-06F-2 ZAKU II F2". The kits went on sale during the second half of the series and its shape and mobile range are one of the best qualities which attracted many fans as a new Zaku's standard model for HGUC series especially with the plenty options. Also, we cannot ignore the fact that a month after Zeon army model was released, Allied force model was also released which made the item so important in order to duplicate the world view. This kit is strongly suggested to prepare for the latest model "RX-78GP01 GUNDAM GP01 ZEPHYRANTHES" releasing in July and "RX-78GP01Fb GUNDAM GP01 FULLBURNER".

## HGUC MS-07B-3 GOUF CUSTOM (1,680 JPY)

This made its appearance as Pilot Norris Packard's air craft in "Mobile Suit Gundam 08th MS Platoon" ep.10 "Shaking Mountain (first half)" and its fearless actions brought many Gouf fans. Not only the actions during the episode, but its distinguished stylish design by HAJIME KATOKI and the bluffed design such as Gatling Shield are highly valued. HG kit sold at the same time as OVA series, has a very high level of completion for that time, but at HGUC, it has a massive shape which resembles the real animation and high detailed right grip, that totally has no failure and is the most perfect. When combined with HGUC GUNDAM E28 released in April 2013, you can duplicate the war in the episode on your table.

## HGUC RX-139 HAMBRABI (1,785 JPY)

RX-139 HAMBRABI which many people remember from Yazan Gable riding on from "Mobile Suit Zeta Gundam", became HGUC in 2012 after 20 years. Prior to HGUC HAMBRABI, MG MARASAI was released in May 2012 and HGUC MESSALA will be on sale in June, which Z GUNDAM fans must be happy about. The kit duplicates the significant figure as a fully new model. The claw arm portion and knee's pullout style burner can also be unfolded which enable for a full transformation except taking out MA system which looks like a slingray. It also has many options such as Feder in Rifle, Sea Snake, Beam Saber, and special base that you will be happy to have.

## HGUC FA-93HWS vGUNDAM HWS (2,940 JPY)

HGUC vGUNDAM is highly estimated for the well detailed grip and its high level of perfection to many details, in addition to the head part made from a mold and seamless parts structure. Heavy Weapon System Equipment Type was released as the variation items. This heavy weapon type was designed by YUTAKA IZUBUCHI and its special feature is a great significant change of the shape by increased unit which was equipped to each body part, Hyper Mega Rifle, and High Mega Shield. vGundam changed its white and blue colors to create closer color to the animation style. Because parts from normal vGundam will be attached, vGUNDAM<->vGUNDAM HWS Equipped model can be duplicated if you build well.

## HGUC EMS-10 ZUDAH (1,470 JPY)

"Mobile Suit Gundam MSGLOO -One Year War-" released at theater since 2004, "EMS-10ZUDAH" made its appearance in the episode 3 and evaluation was done at the 603rd Technology Test Team. Even with the unfortunate origin, its engraving of each part and engraving words on the lower back equipment portion, detailed internal Burner by laser, Monoeye and Visor duplicated with clear parts and etc... are amazingly high-end MG level. This kit has an unbelievable deal that head portion has #1, #2 (#3) unit with blade antenna, and the forehead's reserved unit with a slit is compatible, equipment of Zaku Machine Gun, Sturmfaust, Heat Hawk as well as 135mm Anti-ship Rifle come with it. This is a distinguished item for 2006 released kit, that you will find many fine details everywhere.

## HGUC RGM-96X JESTA CANNON (2,100 JPY)

RGM-96X JESTA's enhanced fire model MS that first appeared in "Mobile Suit Gundam UC" episode 6. Shoulder Beam Cannons, 4 Slot Multi Launcher, Enhanced Beam Rifle and other enhanced equipment are added to HGUC JESTA which was released previously and it duplicates its significant massive style very well. The backpack can release Cannon Unit and can be changed to Jesta style. It can also be attached to Jesta's Beam Rifle and Shield that can make Jesta with enhanced equipment. The play value is very high. You can duplicate Tri-Star by lining up two Jesta or simply enjoy creating your original equipped Jesta.

## HG GN-001/hs-A01D GUNDAM AVALANCHE EXIA' (2,100 JPY)

Avalanche Exia is the first MSV as an official side story of "Mobile Suit Gundam 00V" published in Hobby Japan. This is a relatively popular model because of its concepts of high mobility system considering its "full armor type silhouette" When developed as HG kits, KANETAKE EBKAWA, a designer of Exia, designed new Avalanche Exia' which he added new equipped leg booster. Its popularity is compatible to HG 00 GUNDAM SEVEN SWORD/G (1,680 JPY), however, this has to be noted that it can be played together for HG size. Nice features of this kit are that leg booster unit can be transformed to different systems and it can be built as a normal Avalanche.

## HGAW GX-9900-DV GUNDAM X DIVIDER (1,890 JPY)

"HGAW" and "HGFC" are HG new series started from April, 2010. This series releases MS kits that have not been on UC (Universal Century) series and has released 7 items. The first item was the main character in the first part of "Mobile New Century Gundam X" and was released as a Gundam X variation item. Instead of Satellite Cannon which is the symbol of Gundam X, Beam Machine Gun, Divider, Backpack were added. Divider can duplicate Harmonica Cannon firing position and can be connected to backpack for Hovering Mode. Also, it comes with great values of Bazooka from TV anime series episode 18 and various wrist parts. You do not want to miss this collection to experience non-UC series!

# SD GUNDAM BB SENSHI Guidance

"SD GUNDAM Retsuden" a well-reputed serially published sample models of SD GUNDAM by Hobby JAPAN. In June issue (issue date: April 25), the 100th model will be released. A Plastic Model Kit series, "SD GUNDAM BB SENSHI", plays a great role for the existence of SD GUNDAM Retsuden with its extensive product line-ups. Let us introduce the series of "SD GUNDAM BB SENSHI" and the latest related news all together!!

## What is BB SENSHI Sangokuden?!

"BB SENSHI" 20th anniversary commemorative work. A trilogy based on the motif of "Romance of the Three Kingdoms". In "Mirisha", the stage of "Sangokuden" the various mobile suits become "actors" to take on the roles of various characters of the Chinese literature. Plastic Model Kits on this series are richer and more complete than ever before. Not to mention characters in GUNDAM families, a whole variety of MS have been commercialized as you have seen. Characters of whom the images came from the Chinese literature are armored like Chinese warriors that differs from Japanese warrior, knight and commander series. With the background indicated above, "Sangokuden (Brave Battle Warriors)", one of Legend BB series, now begins its history after the "Battle of the War Gods". Four warriors including STRIKE RYUUBI GUNDAM have the same facial images as MS in Mobile Suit GUNDAM SEED series with new armors. What was happened to Mirisha during the "window period"? The unknown fact is now unveiled before your eyes!!

STRIKE RYUUBI GUNDAM

DESTINY SOUSOU GUNDAM

PROVIDENCE RYOFU

ASTRAY SONKEN GUNDAM

Design: Shinya Terashima

### BB SENSHI No. 383 LEGEND BB STRIKE RYUUBI GUNDAM Will Be Released in June!! (1,470 JPY)

STRIKE RYUUBI GUNDAM armed with ENOH (Infinity Phoenix), RYUJIN (Dragon Sword), and GEKIRYU by combining sacred treasures of ENOH with the one of SORYU. The strongest ever RYUUBI STRIKE RYUUBI GUNDAM can be recreated by placing the sacred treasures. Coating parts (Gold coating) are used for head decoration.

1 Sacred Treasures of ENOH and SORYU 2 STRIKE RYUUBI GUNDAM 3 ENOH STRIKE RYUUBI GUNDAM 4 RYUJIN STRIKE RYUUBI GUNDAM 5 GEKIRYU STRIKE RYUUBI GUNDAM 6 RYUOH STRIKE RYUUBI GUNDAM

### LEGEND BB Series (1,050 JPY each, on sale)

"The Strongest SD GUNPLA" series which is to commemorate the 25th anniversary of "SD GUNDAM BB SENSHI" series. Three artists, Mr.Koji Yokoi, Mr.Susumu Imaishi and Mr.Shinya Terashima, collaborated to develop the models. The models present their original colors and are best proportion models with great movability using poly-parts PC-303. Furthermore, the line of sight can be changed (select two versions out of four). This is the high-quality model series that exceeds the quality of existing any other models!!

#### LEGEND BB KNIGHT GUNDAM

It can be changed from light costume type to knight mode. By replacing backpack parts, it can be changed to the form of Centaurus. Its right-handed model can hold the electrical lance and the knight sword with cool postures. The head visor is prepared with silver coating.

#### LEGEND BB COMMAND GUNDAM

From light costume type to FRAME GUNDAM, then to COMMAND GUNDAM. By combining armaments, Heavy Autocannon platform mode and large cannon mode can be prepared. Head unit is prepared with silver coating.

#### LEGEND BB MUSHA GUNDAM

It can be changed from light costume type to Musha mode. Only partial replacement is required to become "ASHIGARU GM". Naginata and Tonageishi rifle are attachable to its back part. The left hand provides a particular effect on making a nice action posture. The front head part is prepared with gold coating.

#### LEGEND BB MARYUKENSHI ZERO GUNDAM

From light costume type to Maryukenshi Ver.I, then Maryukenshi Ver.II. Thunder sword is clear blue. Only partial replacement is required to change from Ver.I to Ver.II. The left hand is designed to make the LAKUJASS posture. The front part of Dragon face Ver.I is prepared with silver coating.

### NORMAL SD Gundam 1/144 Ver. 1

The "Real SD series" is small body series, a small body series with all gimmicks and particular details of MS. Colorful parts with coloring seals make this model really cool. It demonstrates a high play value since it is transformable and combinable like original models with a whole various options and original gimmicks!

#### DELTA PLUS

Only few replacement of parts provides a selection of pupil variation. It can be transformed to the Web Rider: BASE JABBER (UNICORN Ver.) that can mount MS is included.

#### UNICORN GUNDAM 02 BANSHEE

With some replacement of parts, it transforms from UNICORN MODE to DESTROY MODE. It is based on UNICORN GUNDAM (on sale, 1,260 JPY) and it creates particular features of BANSHEE with some new parts. Enlarged fists and Psycho-frames in shines show the great details of this model.

闇の胎動  
The Subtle Movement of Darkness

BANDAI

The peace arrived in Mutsu.

She, the incarnation of darkness, was defeated by Heroes...

extend their potentials.

most trained themselves to

When the three kingdoms were re-established.

Several years later...

Battles have never ended. Mutsu is full of negative energy of people.

Yes...

KOMEI... Do you see the star...?

This is an old prophecy passed down for generations in RYUTSU.

When the Red Cross appears in the western heavens, again turbulence occurs in the world...

It may start all over again...

The subtle movement of darkness...

That light...

He is not the same person as the one who attacked Goll!

Yes, I know!

You encountered a horrible thing after the meeting with SOHI!

天玉鎧 弩虎  
Tenjū Kōri Kyūko

I will terminate it once for all!

Ohhhhhh!

The collision of light and darkness resulted in the gigantic explosion. The particles and fragments were spread out all over the world...

The light is heading to the village!

Come on, guys!
